Using the HPBT100

- Thank you for purchasing the HPBT100 headset. This unit is designed to provide years of trouble-free audio performance. Please read these instructions carefully for proper operation and save for future reference.

Connecting with Bluetooth

Connecting with Bluetooth

To play audio from a Bluetooth device, you need to pair the device with the headset. You can pair up to eight devices.

1. On your Bluetooth device, switch on Bluetooth and scan for devices in its Bluetooth menu.
2. Turn on the headset. When powering up for the first time, the headset is discoverable for 2 minutes and is ready for pairing. The status indicator flashes blue.
3. When "2B0om" appears on the device list of your Bluetooth device, select it to initiate pairing. (If a pass code is requested, enter 0000). The Bluetooth status light turns solid blue after pairing is established. The speaker is ready to play music.

Connect micro SD card

1. Connect the or micro SD card to the headset.
2. Slide the power switch of the headset to the ON position. The blue power light will illuminate.
3. Hold the "-" to decrease the volume, press "-" to go previous song.
4. Hold the "+" to increase the volume, press "+" to go next song.
5. When you are finished listening, turn the HPBT100 OFF to conserve the battery.

Connect an audio device via its Line-in socket

1. Connect the stereo 3.5mm audio cable to the headphone jack
line - out of any audio device, then connect the 3.5mm stereo plug on the other end to the connector on the HPBT100 headset.
2. Slide the power switch of the headset to the ON position .
3. Press play on your audio device and adjust its volume to listen to audio.
4. Hold the "+" to decrease the volume, hold the "-" to increase the volume
5. When you are finished listening, turn the HPBT100 headset OFF to conserve the battery.

FCC STATMENT

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.
